

Assignment Case	
COMP6047 Algorithm and Programming	
Computer Science	<Case Code>
<i>Valid on Compact Semester Year 2018/2019</i>	Revision 00

Soal*Case***Square in Square**

When Bibi first learned how to program, the first thing she did was printing a square. Since then Bibi have been practicing to draw shapes with code. Recently she found an interesting shape, a square inside a square inside a square and so on. Bibi tried but couldn't do it, so she asked you to help her make a program to print the shape.

Format Input

First line will consist of an integer T , the number of test cases.

For every test case, there will be a single integer N that determines the size of the shape.

N will always be an odd number.

Format Output

Answer with format "Case #X:" where X is the number of test cases alongside the generated shape.

Constraints

$$1 \leq T \leq 200$$

$$1 \leq N \leq 499$$

Sample Input	Sample Output
5 1 3 5 7 9	Case #1: * Case #2: *** * * *** Case #3: ***** * * * * * * * ***** Case #4: ***** * * * *** * * * * * * *** * * * ***** Case #5: ***** * * * ***** * * * * * * * * * * * * * * * ***** * * * *****
