

Pentanacci

Fibonacci is a famous sequence where the first two numbers are 0 and 1 and from then on every number is the sum of the previous two. What most people don't know is that fibonacci have siblings named tribonacci, quadronacci, pentanacci and so on. Here we will discuss about pentanacci. Pentanacci is almost like fibonacci except Pentanacci first five number are 0,1,1,2,3 and from then on every number of pentanacci is the sum of previous five. Given integer N, determine the N-th pentanacci number.

Format Input

Input will consist of integer N.

Format Output

Output the N-th pentanacci number.

Constraints

$0 \leq N \leq 29$
