

Bad Eggs

Lili has bought N eggs needed for Jojo's birthday surprise. However, she noticed that the i -th egg is bad. She thought that she will remember which egg it was, but she forgot, she still remember where it was though. All eggs have a serial number on them. So she insert all the eggs into her egg sorting machine that sorts out bad eggs. She need your help to make a list of the other eggs' serial number in their original order.

Format Input

The first line in the input consists of two integers N and B , the number of eggs Lili bought and the bad egg's index (with 0-based indexing).

The second line consists of N integers X_i , the i -th egg's serial number (no leading zero).

Format Output

Print the serial numbers of the eggs except the B -th egg in their original order as the input in one line separated with single spaces.

There is no leading and trailing space in the output.

Constraints

$$2 \leq N \leq 1000$$

$$0 \leq X \leq N-1$$

$$1 \leq X_i \leq 100000$$

Sample Input 1	Sample Output 1
5 3 4 2 8 13 5	4 2 8 5

Sample Input 2	Sample Output 2
8 2 9 10 33 82 107 3 38 47	9 10 82 107 3 38 47

Sample Input 3	Sample Output 3
2 0 64 42	42
