Case

Palindrome Triangle

Palindrome is sequence of characters which reads the same backward and forward. The program is simple, to make a triangle with palindrome characters and the characters will always be uppercase alphabets.

Format Input

The first line will consists of a single integer T, number of test cases

Each of test case will consists a single integer R, row of the triangle.

Format Output

Every test case output print "Case #T:" where T is the number of test case following with the triangle without trailing space on the next line.

Constraints
 $1 \leq T \leq 100$
 $1 \leq R \leq 60$

Sample Input	Sample Output
3 2 5 1	Case #1: A ABA Case #2: A ABA ABCBA ABDCBA ABCDEDCBA Case #3: A
