
ASCII Products

Lili just learned about ASCII (American Standard Code for Information Interchange) and now she wants to know the product of 2 alphabetic characters' ASCII.
Help her calculate the product.

Format Input

The input consists of 2 lowercase or uppercase characters separated by a single space.

Format Output

Output the product of 2 characters' ASCII.

Constraints

The 2 characters are ASCII characters.

Sample Input	Sample Output
A c	6435

Note

The ASCII of character 'A' is 65 and the ASCII of character 'c' is 99. Therefore, the result is $65 \times 99 = 6435$.
